

Minitab Data Center

The Data Center utility now available in the Minitab Solution Center offers an integrated and seamless way to load, visualize, and prepare data. This solution enables users to explore and understand their data through three new primary features:

1. Data grid
2. Preparation steps
3. Column metrics

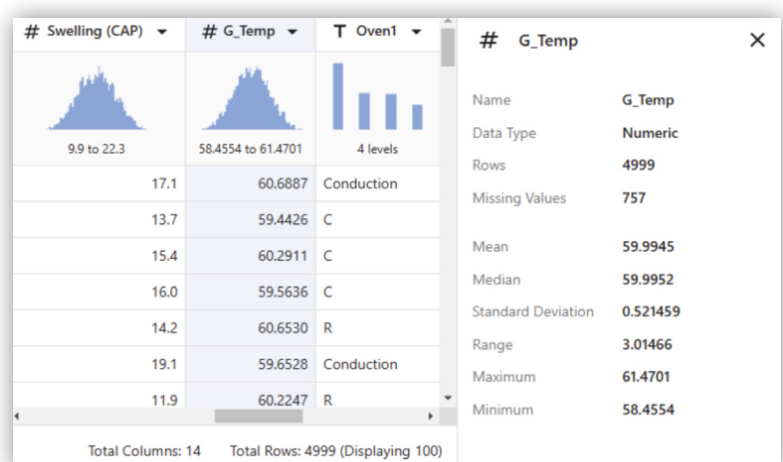

Using an intuitive interface and informative visualizations, Minitab Data Center makes it easier than ever to streamline prepped data into insights. Within the three primary features, users are now able to set up automated data quality checks, automatically generate summaries, and repeat commonly used data preparation tasks.

The **data grid** utilizes a table view of the data showing column visualizations for each metric. This allows for quick interactivity actions against values.

Preparation steps include easy-to-read traceability, undo/redo actions and import/export of steps for repeatability.

Lastly, dive deep into the **column metrics** that show quick stats for each column, allowing users to address missing values, distinct levels for text columns, and descriptive statistics for numeric columns. Statistics are updated for each step as you work.

With the Minitab Data Center in the Minitab Solution Center, users can seamlessly integrate their prepped data into other Minitab Solutions, making it easier to turn data into insightful analyses.

About The Minitab Solution Center

The Minitab Solution Center is a groundbreaking evolution in how Minitab delivers value to users. The Solution Center unifies several powerful Minitab solutions, including Minitab Statistical Software, into a seamless, integrated platform for data analysis, visualization, brainstorming, and AI-powered insights.

Talk to Minitab

Automation and Reporting

Integrate and transform data for analysis, reporting and monitoring

Data Analysis & Predictive Modeling

Powerful statistical software everyone can use

Machine learning and predictive analytics software

Model Deployment and Monitoring

Model lifecycle management on a simple yet powerful platform

Visual Business Tools

Visual tools to ensure process and product excellence

Project Ideation & Execution

Start, track, manage, and execute innovation and improvement initiatives

Self-Paced Learning

Master statistics and Minitab anywhere with online training

Quality Solutions

Monitor, respond, and deliver immediate quality and process monitoring
